Projects

Workit

- "Workit" is a frontend development project tailored specifically for women's health, focusing on connecting users with qualified physical therapists for medical assistance.
- Users can explore detailed profiles of physical therapists, including their credentials, areas of expertise, experience, and patient reviews.
- With a responsive design optimized for accessibility across devices, "Workit" aims to empower women to take control of their health journey by providing a convenient and reliable platform to connect with trusted healthcare professionals in the field of physical therapy.

MyFolio

- Visual Appeal: Created a visually appealing and modern portfolio design that showcased my work, skills, and personality through the use of high-quality images, typography, and layout.
- Responsive Design: Designed and implemented responsive design principles, which that the page displayed and functioned well on various devices, including desktops, tablets, and mobile phones.
- Engagement and Call to Action: Encouraged visitor engagement through clear call-to-action buttons, such as invitations to view the portfolio, connect on social media, or access further information.

Renthomes

- "Renthomes" is a comprehensive frontend development project designed to facilitate users in searching, inspecting, and renting houses directly through the website.
- The platform offers a user-friendly interface where visitors can easily search for properties based on various criteria such as location, price range, amenities, and more.
- The website also integrates features for scheduling property visits, contacting landlords or property managers, and initiating the rental process seamlessly.
- "Renthomes" ensures a smooth and intuitive user experience, making it convenient for individuals to find their ideal rental homes with ease.
